

OUR RECOVERY TIMES ARE SO SHORT, you'll be back to doing what you love.

A major concern after surgery is how long it will take you to recover. Our incredible da Vinci[®] Surgical System is a completely new way to do surgery. Now, "Robotics" doesn't mean some science-fiction character is performing your surgery. It's just that our highly trained surgeons have an amazing new tool that is incredibly precise, which means much smaller incisions and significantly faster recovery.

You'll be doing just what you used to do. Only sooner.

Better health is at the heart of all we do.
