

“ St. Mary's gave us our lives back. ”

Bill and Linda Schultheis were once very active. Then, both developed severe heart failure – getting out of bed was exhausting. “The highlight of my day used to be waking up and going to the living room to sleep,” Bill says.

Bill and Linda received Implantable Cardioverter Devices at St. Mary's Athens Cardiac Arrhythmia Center. Now, their hearts beat in a stronger, steadier rhythm and they are active once again.
